Professional Summary

I have created my experience directly on field, started developing in Open Source culture, digital arts and frameworks a long ago. Last years working at WAD I've been specializing in WordPress Full Stack Development, managing and developing projects for custom themes, e-commerce, plugins and client driven Web Apps. All my work sits as a repositories, version controlled with Git, organized software is the best way to enhance flawless applications with user experience and optimized performance.

I like to collaborate as a team mate or with complementary areas such as UX/UI, or else, always player ready to contribute to projects success.
